

Dino-Lite MS34B stand

The MS34B allows precision focus and stable viewing in a compact design. Due to the precision vertical movement of the holster, a steady view can be obtained, even at higher magnifications. The MS34B works exceptionally well with our Dino-Lite 500x models like the AM413T5 for a quick view or stationary use. With its compact design, it will take up minimal space at home or at work and can be easily carried around with you. The MS34B is a great stand to assist focusing at high magnification and stable viewing wherever you are.
